

Updated Risk Assessments to minimise the risk of being exposed to Covid-19

The process involved consultation with all school staff.

Methodology used for hazard identification and control

In line with the requirements of Safety, Health and Welfare at Work Act 2005 (section 19) it is the policy of the BoM in St. Catherine's N.S. to address significant hazards and risks in the workplace, to assess the risks to safety, health and welfare and to control these risks as far as is reasonably practicable.

The Board is committed to the ongoing identification of hazards, the assessment of the appropriate risks and the introduction of controls to deal with them. In addition, staff are involved and participate in safety, health and welfare issues within the school and are encouraged to identify and report any potential hazards that may exist and to ensure that a risk assessment is carried out.

This revised Risk Assessment includes all relevant updates and necessary control measures to minimise the risk of staff and others being exposed to Covid-19 and these will be incorporated into the Safety Statement for St. Catherine's NS in line with requirements of section 20 of the 2005 Act.

It is envisaged that additional reviews will be undertaken on a regular basis and in line with Government and public health advice to ensure that all information remains accurate, that controls are appropriate and where necessary risks are reassessed.

A **hazard** is anything with the potential to cause harm to the safety, health or welfare of staff, students, visitors and contractors – a wet or slippery floor, an unguarded machine, stressful work, a blocked entrance, hazardous chemicals etc. Hazards may be classified as physical, chemical, biological, environmental or human.

A **risk** is the likelihood that someone will be harmed by a hazard and the severity of that harm.

Control measures:

A control measure is an applied measure that reduces the level of risk. Control measures can be applied at the planning stage, can comprise physical measures, can be management issues and can include training. Good control measures will require a combination of some or all of these.

Who may be affected?	Identified Risks	<p style="text-align: center;">Risk : Communication, Education and Training</p> <p style="text-align: center;">Controls</p>	Risk Rating with controls	Action implementation

Warm water and appropriate sanitisers (i.e. hand gel dispensers, etc.) will be available where possible throughout the school. Staff should:</p> <ul style="list-style-type: none"> ✓ Wash their hands properly and often. Hands should be washed: <ul style="list-style-type: none"> ○ After coughing or sneezing ○ Before and after eating or preparing food ○ Before and after using protective gloves ○ Before and after being on public transport ○ When arriving and leaving the school campus ○ After toilet use ✓ Cover their mouth and nose with a tissue or their sleeve when coughing and sneezing. ✓ Put used tissues into a bin and wash their hands ✓ Develop a routine of increased cleaning and disinfecting of frequently touched objects and surfaces <p>The BoM will supply required cleaning products, will ensure the correct use and storage of disinfectants and will ensure all products are stored safely and securely.</p> <p>No employees are permitted to attend work if they display any of the symptoms below: -</p> <ul style="list-style-type: none"> ✓ Fever (temperature of 38 degrees or above) ✓ Cough ✓ Shortness of breath ✓ Breathing difficulties ✓ Changes with sense of smell and/or taste ✓ Fatigue ✓ Aches and pains ✓ Sore throat <p>Circular 42/2021 will be followed as it is up to date as and from August 11th 2021.</p>	<p style="text-align: center;">Requires monitoring</p>	<p>Board of Management Principal Staff Visitors</p>

- An employee who has 'significant vaccine protection', as defined in this Circular, and who has been advised by the HSE they are a close contact of a confirmed COVID-19 case, may be required to inform their employer. The HSE rules around restricted movement have changed for individuals with 'significant vaccine protection'. In certain circumstances determined by the HSE, such individuals are no longer required to restrict their movements where they are a close contact of a confirmed COVID-19 case.
- Where an employee is required to attend the workplace and is a close contact, the employer may need to establish in limited circumstances, if he/she has 'significant vaccine protection', in order for the employer to take a decision in relation to health and safety requirements and workplace attendance.
- There have been important changes to the HSE criteria available at this HSE link, based on factors such as:
 - o If an individual has significant vaccine protection or has recovered from COVID-19, no restriction of movement is required, in certain circumstances.
 - o If an individual is a close contact, self-isolation rather than restriction of movement may be required, in certain specified circumstances.
- Staff can follow <https://www2.hse.ie/> for regular updates or can contact HSELive for advice **1850 241850**
